

MaaS (Mobility as a Service)

A company started in 2016

A team of 26 people based in Auvergne

Already 40 clients with a contract over several years

An actual rate of 1,000,000 trips per year

Eco mobility accelerator

€2.4m raised in 2019 from

Real strengths to become the first MaaS platform

A living lab with hundred thousands users

White label technology with SaaS model

A new approach focused on user experience

Scrollez pour le découvrir

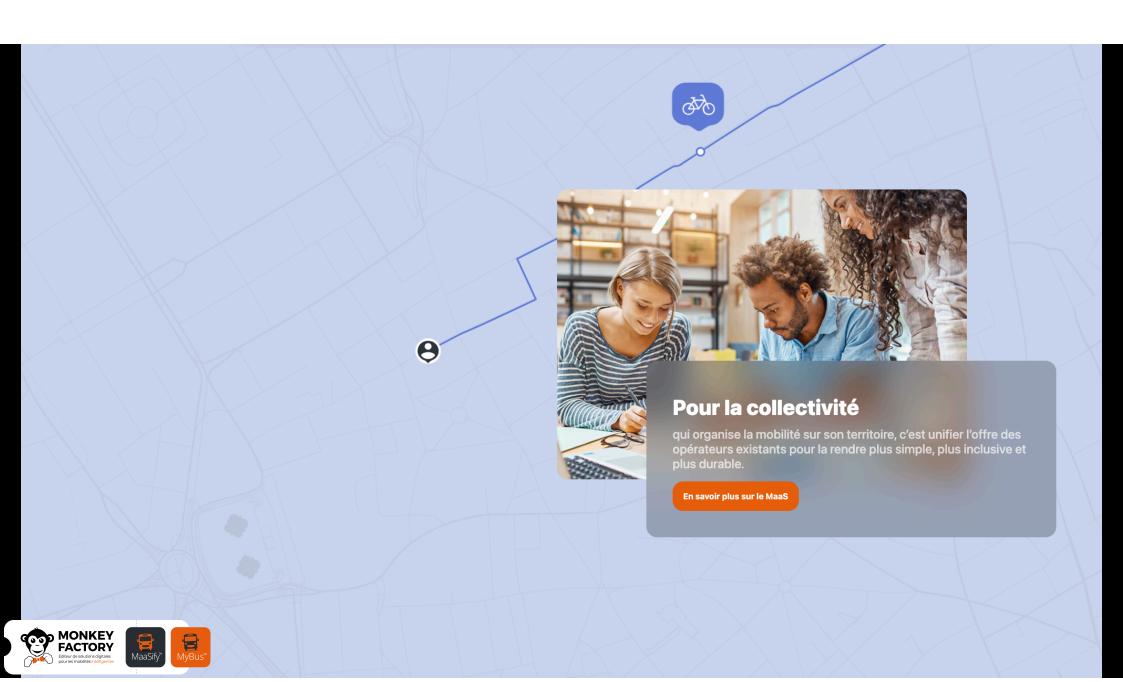

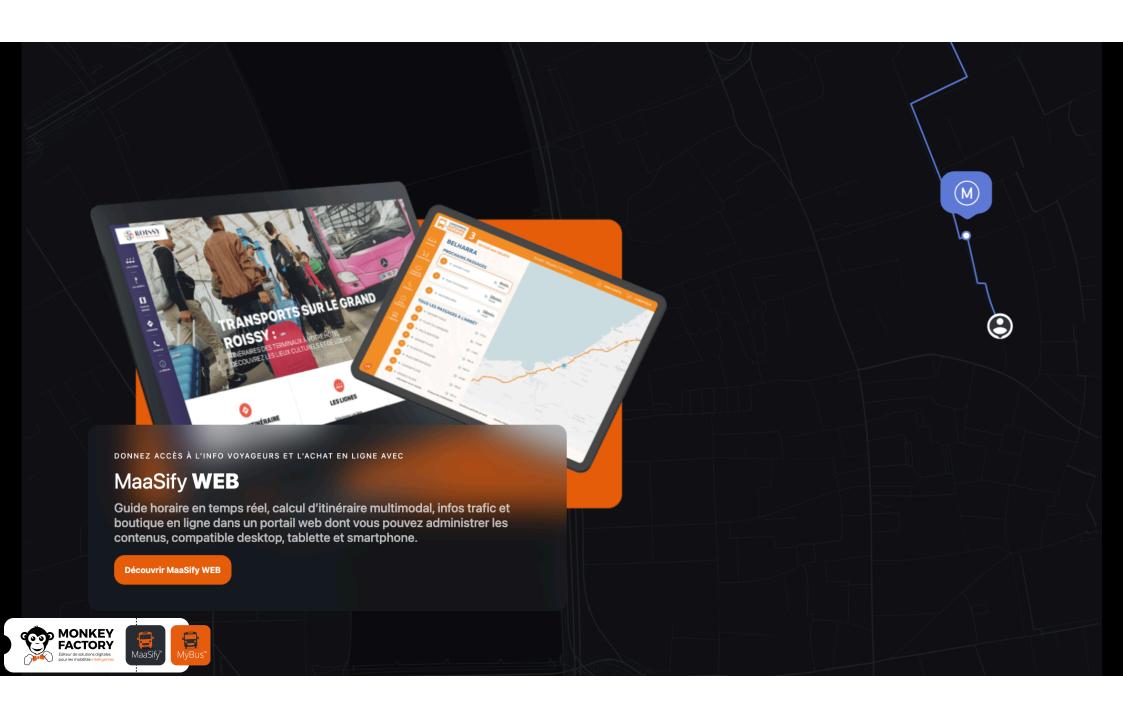

Quelles solutions pour le MaaS?

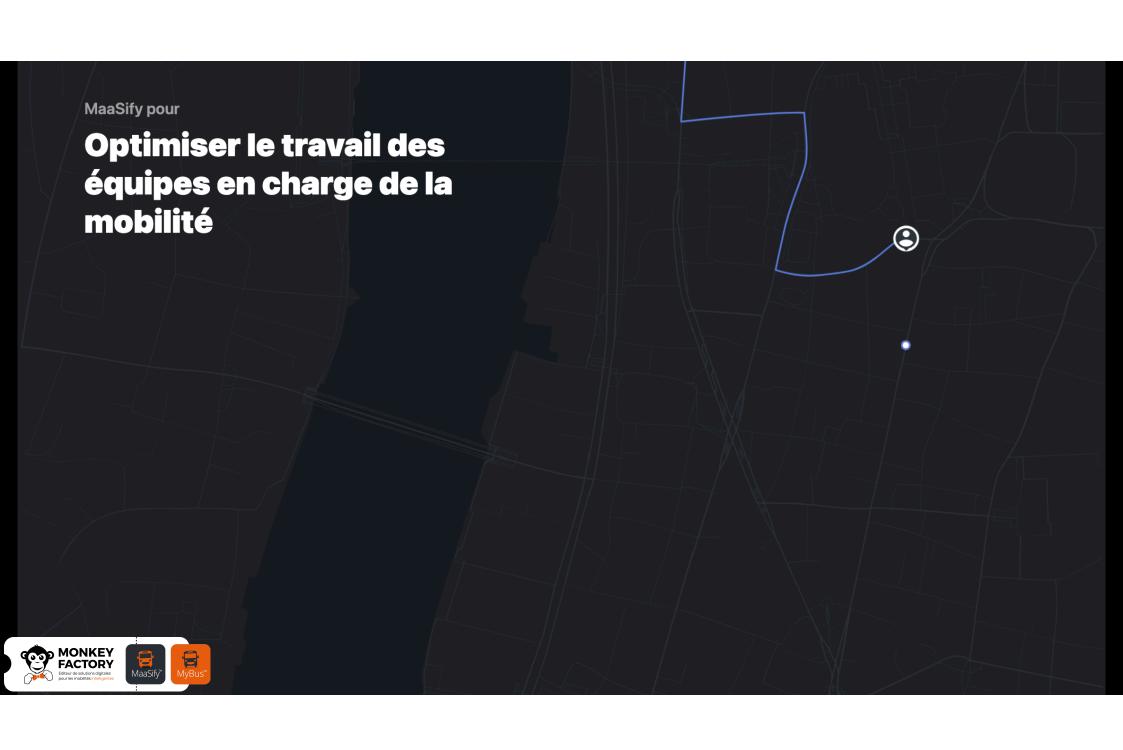

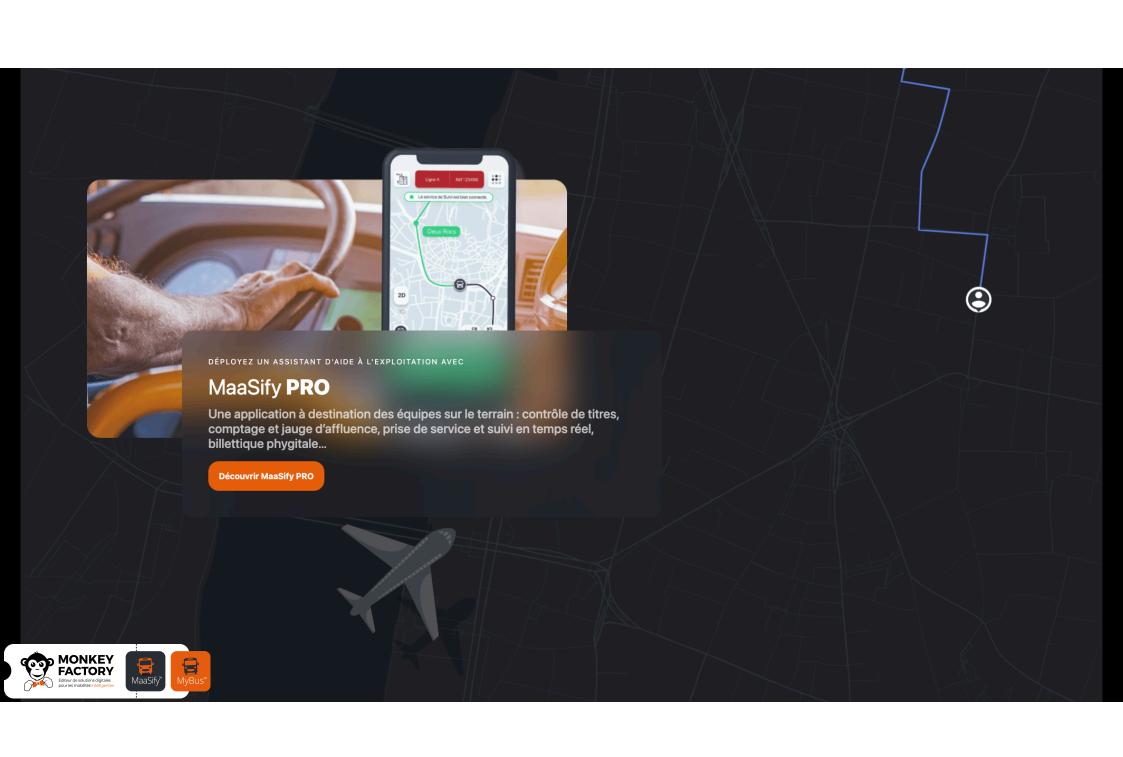

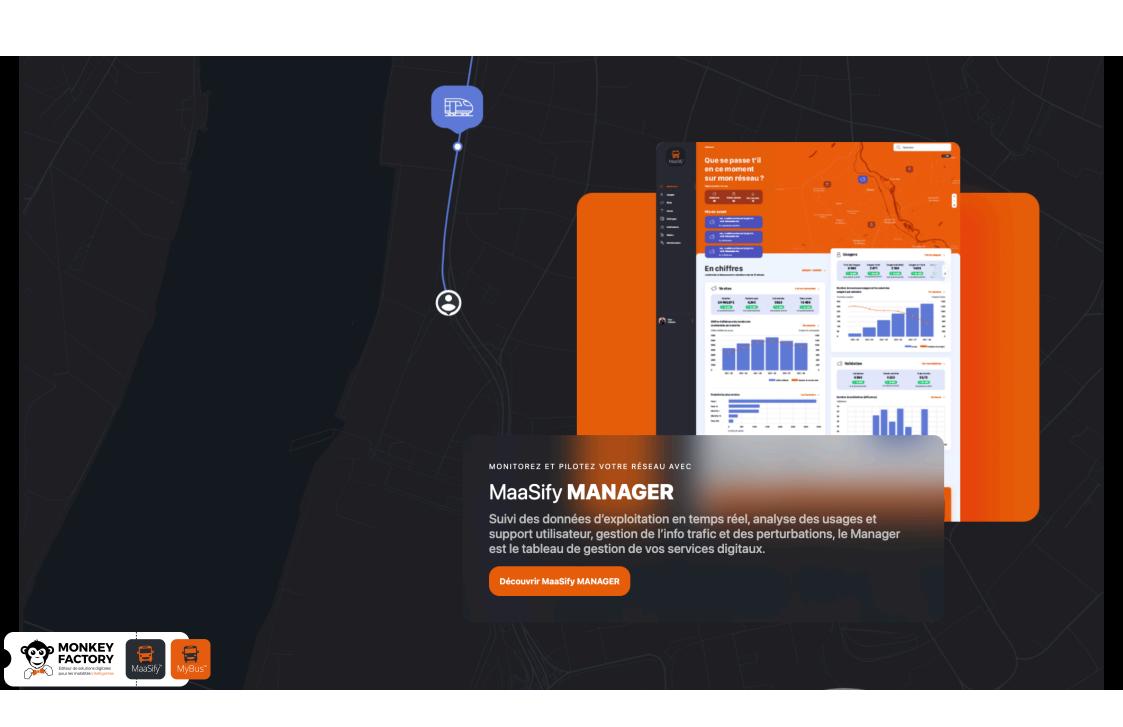

Eco Mobility, no plan B for local authorities

Local administrations heavily invest in alternative mobility to reduce transport impact on climate and to fight again downtown congestion.

Bike lanes, pedestrian crossings, buses, tramways, shared bicycles & electric cars are often available but their use still needs to be facilitated.

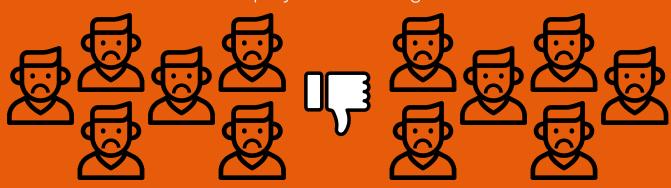

Yet, Maas is still not a reality

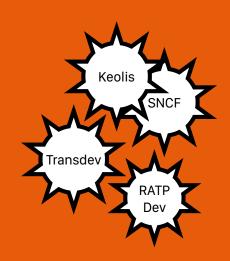

MaaS is still a concept, the service is still not available, no player has emerged.

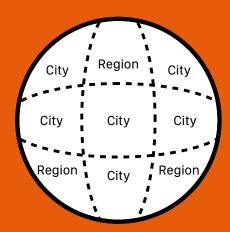

Why is there still no answer avaible on the market?

Oligopolistic market

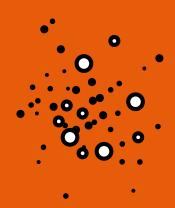

Public transport network operators

Territorial partitioning

Public authorities for mobility

Very fractional offer

Alternative mobility operators

MaaSify to make MaaS operationnal

Public transport network operators

Public authorities for mobility

Alternative mobility

operators

MaaSify is the future transversal platform which connect all daily sustainable mobility players
